Huy Nguyen

(832) 774-5092 | huyhnguyen2311@gmail.com | github.com/Huyyen1123

Education

University of Houston
Bachelor of Science in Computer Science *Expected: May 2028*

GPA: 4.00/4.00
Relevant Coursework: Programming and Data Structures, Computer Organization & Architecture, Machine Learning, Discrete Mathematics

Technical Skills

Languages: TypeScript, JavaScript, Python, C++, SQL, Luau, HTML/CSS
Frameworks/Libraries: React, Next.js, React Native, Expo, Flask, Django, Jinja2
Tools/Platforms: Git, SQLite, REST APIs, OpenAI API, Roblox Studio, Claude Code
Concepts: Object-Oriented Programming, Relational Databases, Cross-Platform Development, Debugging

Experience

Freelance Animation Developer
UMAMI Matcha *October 2026 – Present*
- Commissioned to develop a custom **pixel-art animation** for a matcha pop-up brand, featuring **four** animated characters and interactive café production sequences.
- Designed sprite animations, including walk cycles, role transitions, and drink-making movements.
- Built timing logic to sync character interactions, station transitions, and looping effects.

Web Developer | Python, Flask, Django Houston, TX
Lone Star College *August 2025 – May 2026*
- Built and deployed websites for multiple student clubs (**20–50** members each) using **Flask/Django**, each self-hosted on its own domain.
- Designed a relational database to persist member sign-ups and profile data in place of static pages.
- Implemented event calendars and registration forms, and maintained the sites independently over a full school year.

Projects

Nestwise | *Founder & Full-Stack Developer* | ***TypeScript, React, Next.js, React Native, Expo, OpenAI API***
- Architected an **AI-powered** parenting platform across web and mobile, delivering personalized product recommendations, developmental guidance, and daily task planning.
- Developed a cross-platform mobile application using **React Native**, **Expo Router**, and shared **TypeScript** logic to support personalized dashboards, calendars, and an AI companion.
- Integrated AI-driven personalization workflows to generate age-appropriate recommendations and actionable parenting checklists based on household needs and preferences.

Project Downhill | *Game Developer* | ***Roblox Studio, Luau, DataStoreService, MemoryStoreService***
- Developed a **multiplayer** skiing and snowboarding racing game featuring custom movement physics, carving mechanics, aerial tricks, and responsive snow effects.
- Designed a modular matchmaking architecture supporting **cross-server** race queues, reserved race servers, and competitive multiplayer sessions.
- Built gameplay systems for progression, equipment customization, ranked ratings, and persistent player rewards.

MacroFind | ***Python, Flask, SQLite, REST APIs*** June 2026
- Built a **DoorDash/Uber Eats**-style web app to filter fast food menu items by protein, calories, and carbs.
- Developed a **Flask** backend with a **SQLite** database of nutrition data compiled for **8** fast food chains.
- Integrated a geolocation feature that finds nearby restaurant locations and sorts results by distance.
- Implemented filter presets (high protein, low calorie, vegan) and a custom search by macro range.

Activities

CougarCS & CodeCoogs
University of Houston *August 2024 – Present*
- Participate in hackathons and technical workshops, building time-constrained projects with peers.
